

## Adjusted Net Debt

We believe Net Debt and Adjusted Net Debt are useful performance measures of liquidity, financial health and provides an indication of our leverage. We define Net Debt as current and long-term debt, finance leases, other financing obligations, offset by cash and cash equivalents. We define Adjusted Net Debt as Net Debt, less a facility financing lease, to be analogous to the calculation of certain financial covenants. All debt and other obligations present the principal balances outstanding as of the respective periods.

The following table is a reconciliation of consolidated debt and cash and cash equivalents to Net Debt and Adjusted Net Debt as of March 31, 2023 and 2022, in millions:
